

Aerial Work Platforms

Aerial Work Platforms - There are a lot of accessories designed for forklifts which can be used in order to help expand the functionality of your forklift and allow you to pick up objects, handle materials with greater ease or to complete clean-up jobs.

Many of the accessories are specially designed to be able to fit on the blades themselves. Blade extensions for instance, are used when you need much more fork length, which increases lifting capacity. Fork extensions come in lengths ranging from forty eight to one hundred twenty inches. Triangular or rounded accessories are one more variety utilized if moving rolled material in order to make sure it does not roll off of the traditional flat blades.

Examples of lifting attachments consist of pivoting and telescoping crane or boom attachments. They could come in a number of different styles and are most often designed for transferring metal bars, lumber, poles and various sort of bulky stuff. Additional attachments like for example various styles of hooks and hook plates are available to be able to lift items making use of a sling or chain. Slab lifters and magnetic lifters are other stuff which can be utilized together with hook attachments. Slab lifters are specialized attachments which are meant for lifting various materials which are delivered in a sheet or slab format. Rug rams or carpet poles are other lifting tools that connect to your forklift in order to make transferring rolls of carpet easier. The attachment connects onto the lift truck's blades and has a pole which goes through the center of the carpet roll.

There are many different kinds of lift truck accessories that can be utilized for facility maintenance such as snow blades. These forks connect to front end loaders and could transport materials like for instance snow, dirt and soil. Other popular cleanup attachments include magnetic sweepers and standard sweepers. Standard sweepers consist of a broom that the forklift forks hook onto for sweeping large spaces like warehouse, factory floors and parking lots. The magnetic sweeper is the same except that it has a magnetic plate rather than bristles. The magnetic sweeper is utilized in places where there is lots of metal debris like on shop floors for instance. Sweepers have widths up to sixty inches and this surface area makes clean up simple and quick.

Material spreaders are other accessories utilized on forklifts. These spreaders are helpful for a variety of applications like spreading fertilizers, insecticides, seeds, ice melt, rock salt and pellets.

Work platforms are another optional lifting attachment that many businesses use daily. The platforms range in size from 36" x 36" to up to 60" x 60". There are several units existing which are capable of folding up and storing into a smaller space. Work platforms are designed to raise employees up to an overhead location with the use of the forklift. Larger platform models have added space for employees in order to carry tools and other necessary items intended for the job. Often work platforms are made of steel or poly material.
